Racking Types

Double Deep Pallet Racking

VNA Pallet Racking

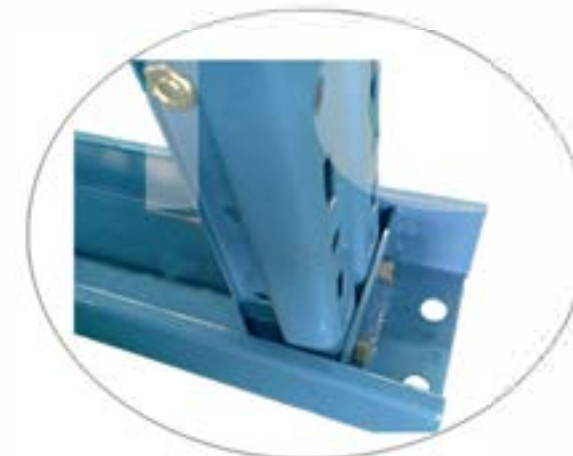

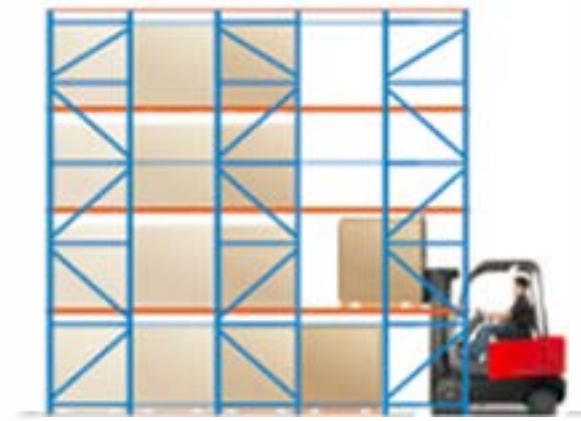

Cable Racking

A-Frame-Racking

- Maximum utilize warehouse storage space
- Make goods First In First Out or First In Last Out
- Ideal for large quantity with fewer variety goods, at least one type of goods in one aisle suggested

Ground Rail

Drive In Arm 1

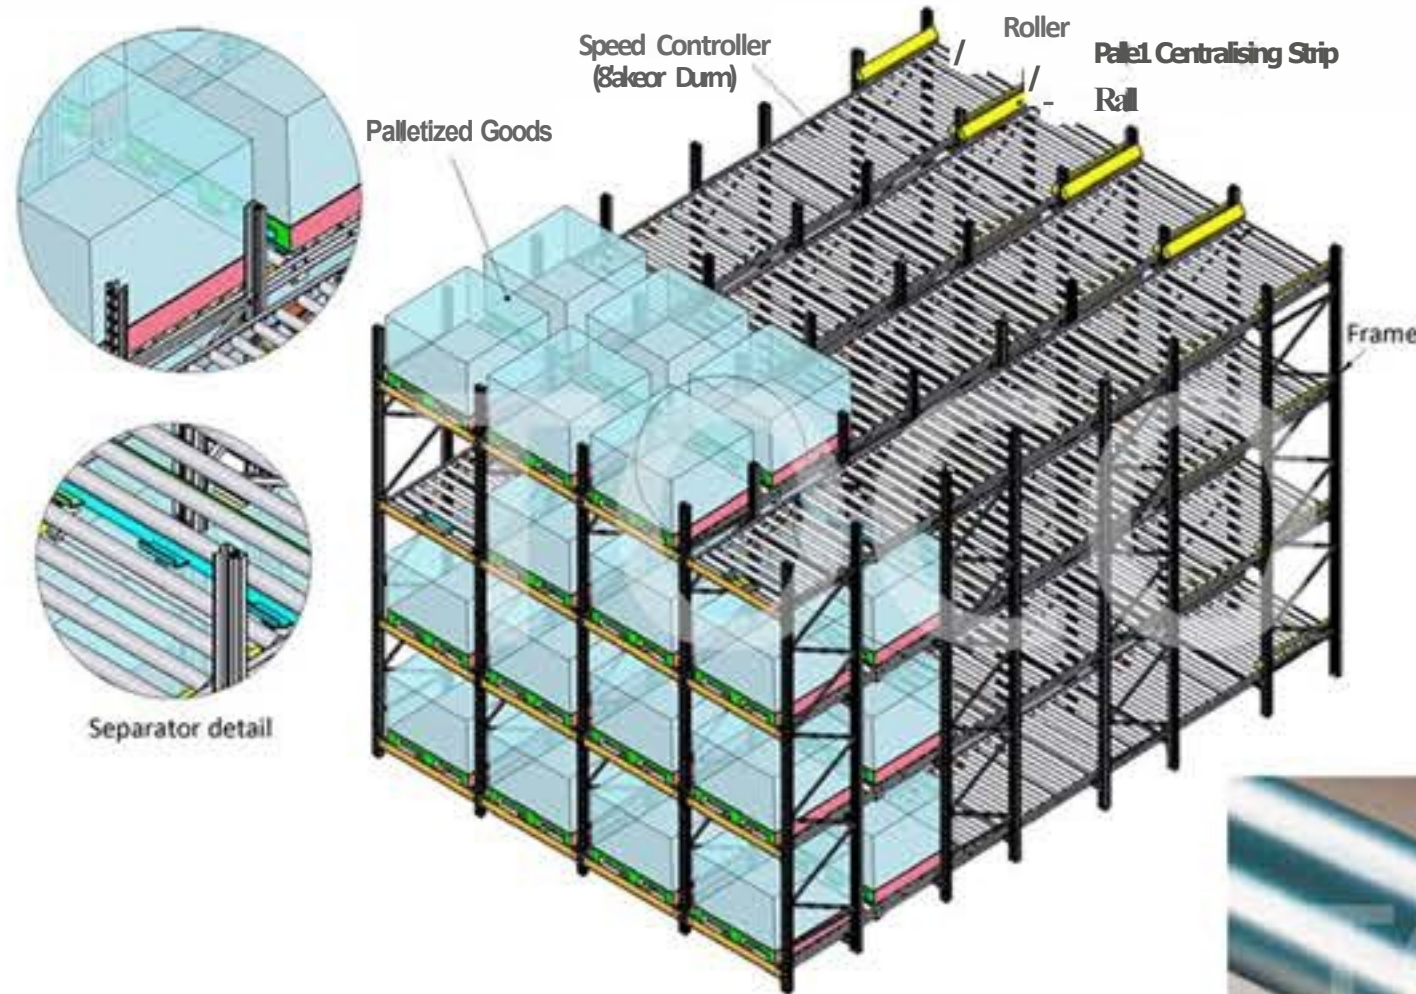

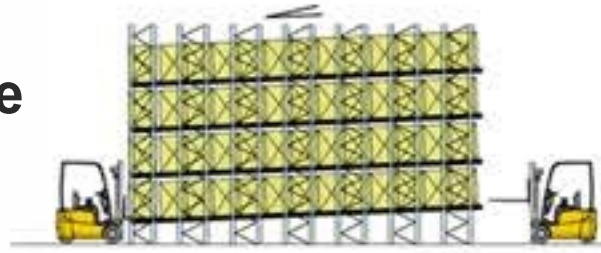

Top Bracing

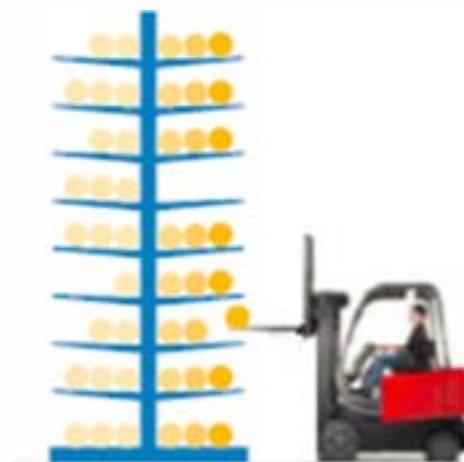

Drive In Arm 2

- The Pallet flows automatically by gravity on principle of FIFO, thus time saved.
- High utility of warehouse space
- Safe and reliable storage system, low maintenance cost
- widely used in food, automobile, pharmaceutical and chemical industries.

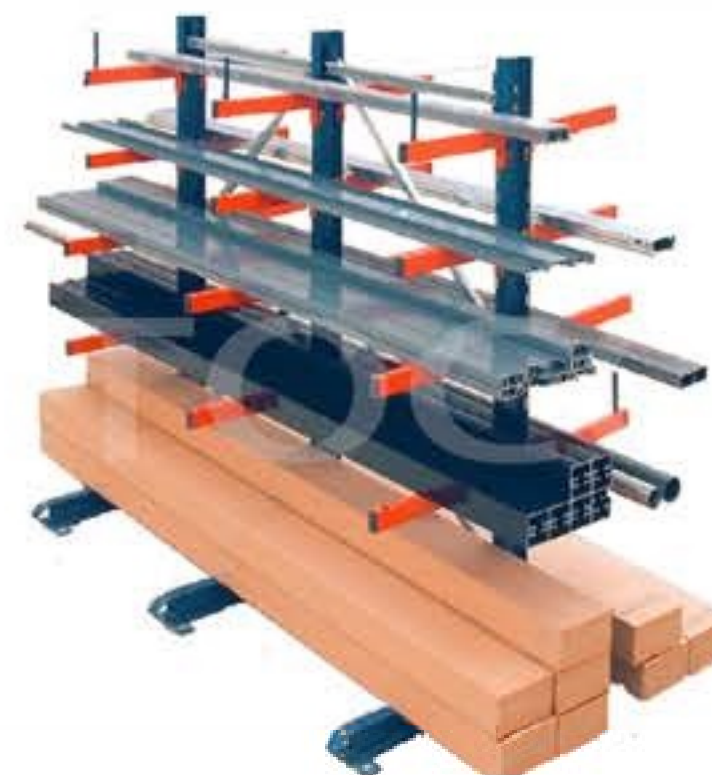

Cantilever racking is specially designed to store long or varying length items, such as metal beams, pipes, wooden boards, metal and plastic sheets etc., widely used in mechanical processing, architecture material supermarkets. As per different capacity needs, it can be classified as light duty, medium duty and heavy duty cantilever racking.

Heavy Duty Cantilever Racking

• Medium Duty Cantilever Racking

Light Duty Cantilever Racking

- 3/ Emergency Beeper
- 4/ Working Light
- 5/ Power Switch
- 6/ Detect Laser
- 7/ Bumper Strip
- 8/ Yellow Light
- 9/ Battery
- 10/ Remote Control

This is a semiautomatic compact pallet storage system, using a shuttle move the goods into the aisles. The forklift does not have to enter the aisle.

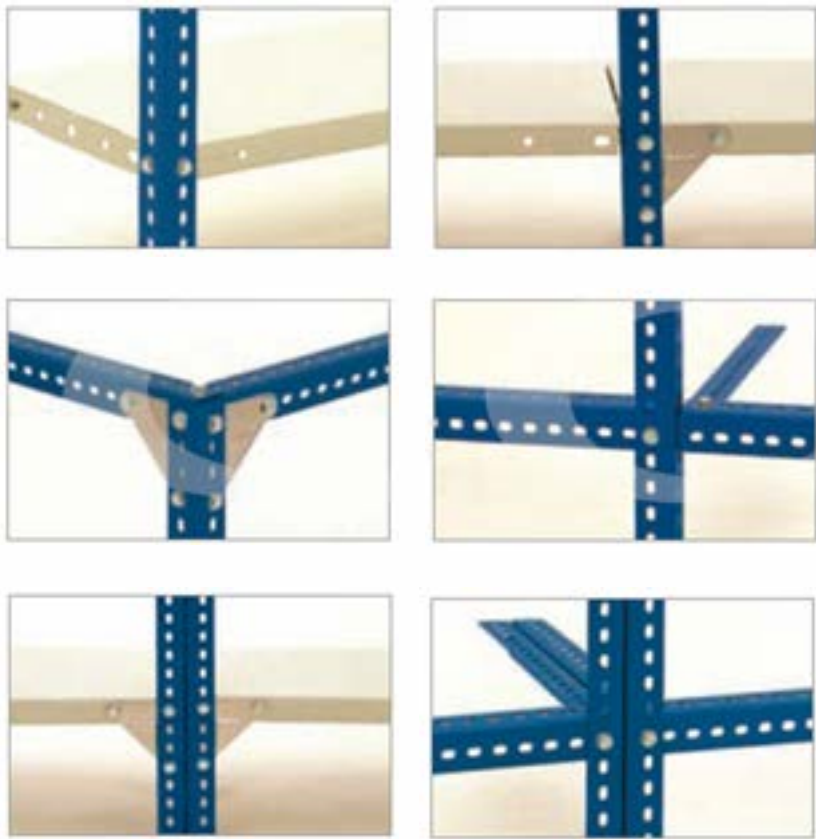

- Compared to normal drive in racking, Radio Shuttle Racking is more safer, and save much operation time.
- Compatiable with different pallet sizes. Higher number of references can be stored as it permits different reference numbers per level of each aisle.
- Simply add rhore shuttle cart, the flow of incoming and outgoing goods increases
- Ideal for high density compact storage, cold storage, food, buffers for temporary storage, etc.

- Slotted Angle shelving is a versatile light duty shelving that has various assembly ways. It can use metal or wooden shelves by 25mm adjustable. Easy to assemble, manually store goods, suitable for workshops, warehouses, shops.

Slotted Angle and Shelves Assembly
