LOG MATERIAL

Teak has the reputaion of"King of the Wood" who is the one of noble woods from South East Asia natural forest. Teak grows very slow, normally need 50 years to be available for use.while those in diameter 50cm & up grew much longer maybe 100years.

Those Teak has rich oil, wear resisting,more steady characters such as no wrapping,anti-erode,anticorrosive,the teak wil not decay in seawater due to its unique corrosion resistance, so teak is the best solution for boat' deck and furniture,buiding.
